

Biodiversity Team Member

This is a newly formed Team.

Roles will be clarified as we move forward

The main purpose of the Biodiversity Team will be to protect and enhance the biodiversity of the BTC Blue Mountains Club's Trail network and its owned and managed properties, which would involve:

- identifying and controlling invasive species.
- plant and wildlife monitoring and reporting
- tree planting programs
- restoration work

The scope of work could be endless as programs are developed and other groups such as NVCA and local municipalities and educational institutions could be co-opted.
